More Graphics Components

- JLabel
- JTextField
- JCheckBox
- JRadioButton
JLabel

- A JLabel displays a single line of read-only text, an image, or both text and an image.
- Demo Label.java
JTextField & JPasswordField

- JTextField & JPasswordField are single line area where user can enter text through keyboard.
- After a user types in text and presses “Enter”, an event occur.
- The object that receives the action event, should implement ActionListener interface. It should implement actionPerformed() method.
- Demo TextFieldDemo.java
JCheckBox

- Multiple check boxes can be selected at the same time.
- Demo JCheckBoxDemo.java
JRadioButton

• Only one radio button can be selected at one time.

• Demo JRadioButton.java
